Subject: No safe level of glyphosate
Date: Thursday, May 25, 2017 12:18:41 PM

There is no safe level of glyphosate.
Please ban this toxic and harmful chemical.

Healthy living means healthy soil and healthy plants.
Chemical farming isn't healthy.

Glyphosate herbicide has been found in tap water, our children's urine, mother's breastmilk, and childhood vaccines.

Glyphosate has been shown by Monika Kruger of Germany to bioaccumulate in bone marrow, muscle tissues etc.

Glyphosate has been shown to be a neurotoxin, chelator, antibiotic, and carcinogen which also causes liver disease.

One way glyphosate functions is by breaking down the blood-brain barrier and allowing other toxins (such as those found in vaccines and herbicides) into the brain.

Our family has chosen to not eat anything that isn't organic. Toxic chemicals in our food make us sick, and cause inflammation in our bodies/

Please ban this toxic and harmful chemical.
